- ✓ Receive image files via email, Bluetooth or IR
- ✓ Easy to use, intuitive interface
- ✓ Fast image loading
- ✓ Organize hundreds of images
- ✓ Privacy features
- ✓ Rotate, zoom and pan images

View faxes and images directly on your handheld

Take full advantage of your wireless email

Wireless access to email is not complete without the ability to view image file attachments. With AcidImage Pro you can view faxes (TIFF) and image file attachments (JPEG, GIF and BMP) on your handheld as easily as you would on your PC.

Mobile access to fax documents

AcidImage Pro, is the only full-featured image viewing solution, that enables users to view multi-page fax email attachments in TIFF format directly on Palm OS handhelds.

Robust solution for GoodLink customers

AcidImage Pro integrates seamlessly with the GoodLink client software. Wireless email users can view image file attachments on the go.

Advanced image viewing technology

Fast image loading. Zoom in and out, pan and rotate to view every detail or to see the entire image. High quality graphics make it easy to read a fax document or view the fine details of a transit map.

Organize hundreds of images. Create slideshows to show a collection of images. Privacy features enable you to mark images as private.

AcidImage Pro runs on all Palm OS handhelds and SmartPhones including:

- * Treo 600 / 650
- * Tungsten Series
- * Sony CLIEs
